

TBMOPA

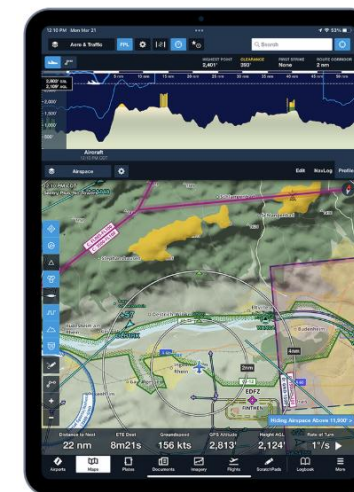

Clear Skies and Shared Horizons: Reflections on TBMOPA Ohrid 2026

We recently returned from a truly unforgettable experience at the TBMOPA European Convention on Lake Ohrid. Now, we want to take a few moments to review the highlights of our time in North Macedonia and, most importantly, extend a massive thank you to everyone who made this event a resounding success.

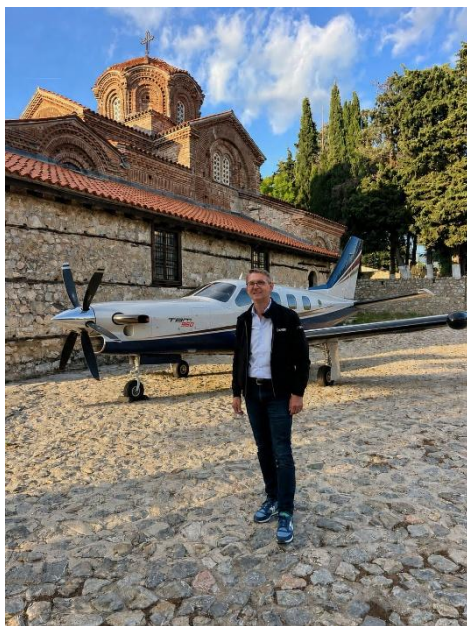

Takeaways: Seminars and Cognitive & Perceptual Human Factors

At its heart, TBMOPA is driven by safety and operational excellence. The seminars this year were top-tier, focusing on technology and human factors. Getting direct, practical cockpit insights from the experts at DAHER, Garmin, and ForeFlight gives us exactly what we need to keep flying smarter and safer.

Beyond the Cockpit – Networking & Culture

Of course, the magic of the European Convention is the community. Beyond the classroom, we enjoyed incredible cultural excursions and sharing a relaxed boat cruise across the lake. The dinners were the perfect setting to swap flying stories, talk summer routing, and build lifelong friendships within the TBM community.

Our Gratitude: Every Participants & Pilots & Organizers

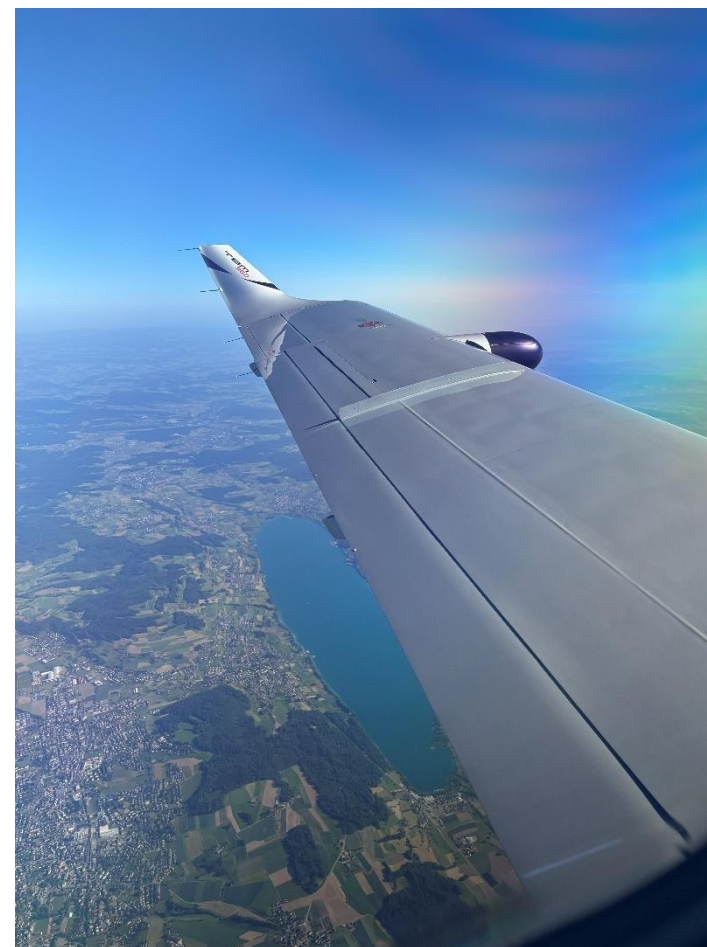

We want to extend a thank you to the TBMOPA leadership team and organizers. Thank you to DAHER and our industry sponsors for their unwavering support. And finally, a huge thank you to all the participants. Your engagement, shared knowledge, and passion for aviation are what make this association a true family.

TBMOPA

Fly Safe – See You at the Next Meeting!

Blue skies, tailwinds, and we look forward to seeing you all at the next destination!
